Filed: July 3, 2001

For:

PROCEDURE AND DEVICE FOR CRACKING OF HYDROCARBONS USING TWO

SUCCESSIVE REACTION CHAMBERS

RESPONSE TO RESTRICTION REQUIREMENT

Commissioner for Patents Washington, D.C. 20231

Sir:

In response to the Office Action containing a restriction requirement mailed April 2, 2003, Applicants elect, with traverse, Group I, claims 1-16, drawn to a cracking process.

Regarding the traversal, Applicants note that non-elected Group II, claims 17-28, drawn to a cracking apparatus, are an almost exact counterpart of elected process claims 1-16. Given the congruence in recitations between the two sets of claims, it is Applicants' position that the apparatus as claimed cannot be used to practice another and materially different process, such as reforming, as stated in the Action. Consequently, the two sets of claims are able to be prosecuted in one and the same patent application.

Respectfully submitted,
